48th World Union World Conference on Lung Health, Guadalajara
11th October 2017

Pre-course instructions: Installing Berkeley Madonna

During the practical sessions we will be using software called Berkeley Madonna. To help the day run smoothly you are requested to install the software as soon as possible by following the instructions below. Please email tom.sumner@lshtm.ac.uk if you have any problems with the installation.

Downloading and installing Berkeley Madonna

You can download a free beta version of the software from the Berkeley Madonna website (<http://www.berkeleymadonna.com>) by following the instructions below for the type of computer you are using (Windows or Mac OSX).

Windows version

1. Click on the “**Download**” link at the top of the page
2. Click on the link “**Berkeley J Madonna 9.0.127 for Windows (stable)**”
3. When prompted, save the .zip file to a suitable location on your computer
4. Right click on the downloaded .zip file and select ‘Extract All’. Enter a suitable location for the extracted files and click “Extract”
5. Open the extracted folder and open the sub-folder ‘disk1’. Double click the SETUP.EXE icon
6. Follow the prompts to install Berkeley Madonna

Mac OSX version

1. Click on the “**Download**” link at the top of the page
2. Click on the link “**Berkeley Madonna 9.0.127 for macOS (beta)**”
3. When prompted, save the .dmg file to a suitable location on your computer
4. Double click on the downloaded .dmg file
5. Follow the prompts to install Berkeley Madonna
